

Appendix 2

Quality Policy

AET Engineering Ltd.

AET Turbos has been established since 1974 to repair and remanufacture turbochargers and continuously quality approved to ISO 9001 since 1990 in the following markets

- Trucks
- Passenger cars
- Power generation
- Construction industry
- Agricultural
- Marine Applications
- Motorsports Applications

We aim to provide our customers with

1. Repaired or remanufactured products that perform at least to the original manufacturers' specification.
2. Design and development of turbocharger products and services
3. A fast professional service with clarity of price and on time delivery

In order to do this we have implemented a quality management system (QMS) that meets the requirements of ISO9001:2015. This ensures we

1. Operate in a consistent manner in line with our documented business processes.
2. Audit / review our QMS, assess our place in the market and define business strategy.
3. Define objectives to continually improve our business and our QMS.

AET Turbos is committed throughout the company to satisfy all the applicable requirements of the standard; continually striving to provide excellent customer service and deliver the best customer experience.

All staff have been made aware of this policy.
